

Discord bot that takes commander decks pasted by link or decklist and adds them to the pot. whenever you want to just pick a deck to play, invoke the bot and it'll spit out a random deck with the decklist.

user modes:

- self-only
 - default
 - returns random deck from user that invoked the bot
 - /user user
 - return random decklist from specified user
- exclude-self
 - provide list of people playing in game
- include-self
 - provide list of people playing in game

deck groups

- create deck groups for things like challenges or to categorize decks
- users can include or exclude deck groups when invoking bot

additional features

- weights
 - bot collects frequency that user receives a given deck
 - default
 - lowers chance of user getting higher frequency decks the more the bot is invoked
 - /ignore_weights
 - full random, ignore weights
 - /invert_weights
 - heightens chance of user getting higher frequency decks the more the bot is invoked

long term features

prototype deck builder:

- provide the bot with a commander

- hits edhrec to pull in top synergy cards
- builds deck with recommended numbers of cards
- can take additional card inclusions to modify search results from edhrec
- basically no real work here, just hitting the edhrec synergy api a bunch lol
